

## Horoscope for period: July 13 to July 26

**Aries** 21.3 - 20.4  
You may have been spending time thinking wistfully about a past relationship. It's nice to remember the good times, but not if it negatively affects our present lives. Those without a partner right now will have a nice surprise soon.

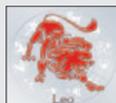

**Taurus** 21.4 - 20.5  
With summer here you have probably been considering more exercise, though some of you will have given up already as it is 'too late'. If you aren't ready for flaunting yourself in a bikini or tight trunks this year, think of the next one.

**Gemini** 21.5 - 21.6  
This is a really good moment to tighten your belt and save a little extra cash if you can, as an opportunity is about to be presented to you that you will most definitely want to take advantage of. It would be shame to have to say no due to lack of funds.

**Cancer** 22.6 - 22.7  
Sometimes you can share your opinions a little too widely. It can be a good move to try to remember the way we think is very individual and may not apply to everyone. You cannot judge another's life without knowing their circumstances.

**Leo** 23.7 - 23.8  
Someone is about to surprise you with a wonderful lesson, not one you will necessarily enjoy, however. It's time to swallow your pride and accept whatever they show you though, as it will benefit you greatly in the end.

**Virgo** 24.8 - 23.9  
The coming weeks may bring a little disruption to your life but it will all be worth it in the end. Sometimes the most difficult periods turn out the best in the end. Be patient and you will soon see the meaning of your circumstances.

**Libra** 24.9 - 23.10  
You really need to pay more attention to your health. Burning the candle at both ends can most certainly be fun and/or productive but it always has a negative effect on our bodies in the end. Try to make time to relax.

**Scorpio** 24.10 - 22.11  
A good clear out will leave you feeling fresh and invigorated, whether it is of your possessions or your friends. If anyone has been causing you to feel negative for a long time now it may be a good moment to review your relationship.

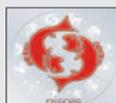

**Sagittarius** 23.11 - 21.12  
A change is coming your way soon, and it looks like it will be something to do with your job. You will certainly be made an offer that will be worth serious contemplation. Think carefully before you act, but then don't look back for one moment.

**Capricorn** 22.12 - 20.1  
For one who generally likes a steady and organised life you have been rushing around in chaos for a while now. It is probably time to ask yourself what it is that has changed and if this is really what you want for yourself.

**Aquarius** 21.1 - 20.2  
Is there a secret you have been keeping to yourself? There is certainly something bothering you. Going over and over the same ground will get you nowhere. It's probably time to decide to either speak out or keep quiet forever.

**Pisces** 21.2 - 20.3  
Is most of your exercise mental lately? Maybe it is time to join a class or club: whatever it takes to get yourself motivated. Time moves quickly, and if you carry on like this you may never get round to fulfilling your dreams.
