

Horoscope for period: October 19 to November 1

Aries 21.03 - 20.04
You have to break a few eggs to make an omelette, they say, and this is one refrain that will be relevant to you in the coming weeks as you find that some present relationships dissolve. However, you will also be making new and exciting ones.

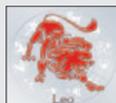

Taurus 21.04 - 20.05
Matters of the heart are highlighted right now, be it within an intimate relationship, with your children or family, or good friends. It's time to take a moment to really appreciate those you have close to you, and express your feelings.

Gemini 21.05 - 21.06
You may find yourself surprised by current events, as a number of small upheavals look likely. However, you will find that the support you are presently gaining from friends and family will see you through any temporary setbacks.

Cancer 22.06 - 22.07
The emotional aspect of your daily life and work really is highlighted at the moment. It may not be the easiest of times, as you could find yourself revisiting uncomfortable moments from the past, but this will be a rewarding period in the end.

Leo 23.07 - 23.08
A little introspection will serve you well over the coming weeks as it appears you will be made an offer you may not wish to refuse. However, there will be a price to pay – as there usually is – so it will be important to know what you really want.

Virgo 24.08 - 23.09
Passion comes in many forms and you've probably found yourself wishing for a little more of it lately. Whether it be love or personal or work fulfilment you are hankering after, try to take some positive steps towards change – you will instantly feel better.

Libra 24.09 - 23.10
Libra, the coming weeks are going to be a whirlwind of happy activity. Your presence will be sought out by friends and family, and everything you try to do will work out positively. There is even a little partying in store; all you need to do is enjoy it!

Scorpio 24.10 - 22.11
Any business travel you've been putting off would be best done before the end of the year if you want the greatest results. Hard work will get you everywhere right now so it will be worth making a short-term sacrifice for a future gain.

Sagittarius 23.11 - 21.12.
All good things come to an end, and you've certainly had a fine time of it lately. However, it's important to remember that life is a journey, not a destination: try to enjoy every moment and not waste time worrying about the future.

Capricorn 22.12 - 20.01
You could be very active socially right now and this is a good time to widen your network, especially by including people from areas of life that are unusual to you. We never know what we have in common with others until we talk to them.

Aquarius 21.01 - 20.02
You may have found yourself wishing for a little more company from spiritually oriented people. It can be hard to find others on the same wavelength at times, but hang on in there as your circle of friends is about to widen.

Pisces 21.02 - 20.03
Work on yourself will pay off undoubtedly, no matter what it is you are trying to achieve right now. A healthy diet and better fitness levels will not only make you feel and look good, they can also stave off any oncoming health problems.
