Horoscope for period: April 18 to May 1

30

Aries

21.03 - 20.04

Your customary hard work and dedication are vital elements of whatever you do on the 27th through to the 30th and beyond, and if you stay focused, you should see the fruit of your labour grow quickly, and much desired achievements fulfilled.

21.04 - 20.05

Make others aware, one by one, of your renewed inspiration. You may be innovating in a time period that cannot accommodate your mind force. Mind over heart is best just now even though that may seem an impossible accomplishment.

Gemini

21.05 - 21.06

If there's something you've been wanting to do but haven't, you can finally commit to doing it at the end of the month, your sense of adventure is great on these days, making it easy for you to try the new and unusual. You are your spatial territory!

22.06 - 22.07

You have important obligations on the 29th, although a spontaneous journey is tempting and very appealing the weekend before. Make sure it's a short trip. Concepts and innovations should be catalogued and prioritised but not forgotten!

23.07 - 23.08

Astrology is not about destiny, it's about choice. It's about carefully considering your options and picking the best. Whilst you usually have freedom of choice or free will, your horoscope does reflect the natural inclinations you have, choose well!

24.08 - 23.09

If you combine energies with another person for a business purpose, there appears to be an interesting creative or artistic twist to your endeavour. You will know your own mind and will be ready to announce your feelings, about a wide variety of topics.

24.09 - 23.10

Romantic love will be saucy and sexy, so bring out your beautiful underwear. With so many good Venus aspects, women will have more opportunities than men. Keep that in mind, it doesn't matter if you are a male or female reader, but ladies, it's your turn.

24.10 - 22.11

You can't help but get irritated by things you can't control, like traffic and other people's ignorance. Tolerance is a lesson you learn slowly, but if you make an effort to be less judgmental, you should be able to make some new friends.

Sagittarius

23.11 - 21.12

Your sensitivity makes you a good and sympathetic friend; the first thing on your agenda for now should be to take a break. Your career has been a consuming focus since January, so you'll enjoy the happening social scene the planets will cook up for you.

Capricorn

22.12 - 20.01

Romance will be in the air, with an unusual number of planets sitting cosy in your house of true love, you'll have all the winning cards. Play them while you have them! Married? Steal time for a memorable weekend together and enjoy makin' whoopee.

21 01 - 20 02

Letting other people see your weaknesses and vulnerabilities could leave you feeling defenceless. Your career will become a major focus. Keep watch for clues and have a spiffy new resume ready in case you should get that magical phone call!

21.02 - 20.03

Your ruler, Neptune, is conservative at the Full Moon on April 18. Dreams and plans for your future may appear to be on hold, even if they are slowly progressing. With planetary opposition in your sign all year so far, discernment is imperative!
