

Horoscope for period: May 2 to May 15

Aries 21.03 - 20.04
There are lessons you have to learn, issues to be faced and problems to be solved. Astrology can provide the keys to understanding, but it doesn't necessarily provide clear, simple answers to any problems which you may be dealing with.

Taurus 21.04 - 20.05
Plan to party — you'll be the centre of attention, and quite charismatic, although you may feel like crying when you're frustrated in your plans, or face opposition to your ideas. However, someone will call you brilliant — and guess what? You are.

Gemini 21.05 - 21.06
It's easy to overreact when something you consider to be dramatic happens but the last thing you want to do is call attention to yourself. Wait until the dust settles to tell your story, the only troublesome spot in this bright picture is a turbulent romance.

Cancer 22.06 - 22.07
A business relationship has been causing you concern for many months now and things may be coming to a head. Planetary movements will influence your love sector and it may be an idea to re-examine a bygone episode with greater scrutiny.

Leo 23.07 - 23.08
Creativity will be so high this month that you should certainly set aside time to potter and play. Why not try a new craft? You may be very proud about what you turn out and justifiably so. Your best financial days will be the second week in May.

Virgo 24.08 - 23.09
As a Virgo, you really need a settled home life and when domestic issues are left undecided you feel uncomfortably off-balance. Once you finally make a decision, you'll feel relieved, but don't expect miracles and most of all don't rush your fences!

Libra 24.09 - 23.10
A generous raise should come to match your growing career stature, but it won't be likely to happen without your intervention. Those who ask, receive! If you're retired check all the small print to make sure you are receiving all your entitlements.

Scorpio 24.10 - 22.11
There are many discussions going on behind closed doors, but 'higher-ups' won't reveal what it's all about yet. Time will reveal all. In this made-for-love time, dress up! Cupid and his little fleet of angels will work hard for you, so don't stay home!

Sagittarius 23.11 - 21.12
There will be many occasions when you come across as both warm-hearted and very hip - no surprise to those who know the real you! Everyone will want to know your name! Don't let your new public image and popularity go to your head.

Capricorn 22.12 - 20.01
Free your mind, body and soul by doing something fun and reckless on the 3rd, 4th and 5th, it's all work and no play for most Capricorns, especially if you have a demanding boss or partner who has a mile-long 'to-do' list made out for you.

Aquarius 21.01 - 20.02
Romantically, things are back on track. It's time for fun and love. Whether single or attached, you'll feel ultra-sexy and loveable. Stay focused, you should see the fruits of your efforts quickly. You have the opportunity to make a dream a reality.

Pisces 21.02 - 20.03
After the New Moon on the 4th, friends and new faces will fill your life, offering a delightful distraction to the month's heavier moments. Taking a spontaneous journey is appealing but the trip will have to be short due to important obligations.
