

## Horoscope for period: September 5 to September 18

**Aries** 21.03 - 20.04  
Personal aspects could affect your general energy greatly and within those broad brush strokes, the overall atmosphere will have a large dose of 'not quite right' intensity. Opportunities may feel just out of reach of your usual clarity.

**Taurus** 21.04 - 20.05  
I don't want to be a complete party pooper but your planetary map is not an indication of pure unbridled joy. However, it could be simply a case of your having worked too hard and are consequently too exhausted to enjoy any festivity.

**Gemini** 21.05 - 21.06  
There is a chance that someone, perhaps a member of the family, will make life rather difficult. Grin and bear it. In the words of Scarlet O'Hara: Tomorrow is another day as you put your new priorities into dramatic action with great success.

**Cancer** 22.06 - 22.07  
The middle of the month could present inner roadblocks. You may try to discover what you truly need to feel complete, only to find that you have no answers at present or perhaps lack the energy and courage to discover the truth.

**Leo** 23.07 - 23.08  
On the one hand this may be a period when matters related to the home and family take precedence - but the Full Moon (September 14) could make for some pretty powerful and unscheduled developments and a bit of a bumpy ride!

**Virgo** 24.08 - 23.09  
Sometime soon you may be asked to look clearly and honestly at your life. This doesn't sound so bad—and it isn't. Your intellect may be perfectly happy in this role, but your feelings are a bit less sure. Take heart the future is looking bright.

**Libra** 24.09 - 23.10  
At the Full Moon (September 14), it is best for you to keep tradition behind you as you go out and conquer! Events of the last couple of months may have zapped your optimism so that celebration seems somewhat inappropriate, but go for it!

**Scorpio** 24.10 - 22.11  
Making an independent move is going to be a luxury right now. Other people, especially partners, will want their say in your affairs and certain individuals could have a major effect on your long-term plans. Be cool about telling people to butt out.

**Sagittarius** 23.11 - 21.12  
For some of you this is a time to fall in love and move forward in a relationship. The Full Moon is as always an empowering event, especially this fecund Harvest Moon. Your intuition is supercharged, take full advantage of that.

**Capricorn** 22.12 - 20.01  
As we head towards the last quarter of the year, your future changes into the calm and serenity you have been striving for. Take a deep breath, try to see what this pattern is telling you about yourself and remember that the planets are always in motion.

**Aquarius** 21.01 - 20.02  
Instead of burning the candle at both ends, you could think about putting your health and fitness first. Planetary juxtapositions earmark the beginning of a six-week period of considerable activity on the career, life-direction and domestic front.

**Pisces** 21.02 - 20.03  
The problematic energies of today will become the helpful aspects of tomorrow. Just a few days later, you will be given a helping hand in the communications area. Visionary ideas are available to you now, as well as the skills to convey your insights.

## Contacts
