

Horoscope for period: September 19 to October 2

Aries 21.03 - 20.04
You have the ability to make a profound impression, so force yourself to be the life and soul of the party, even if you're not in the mood. Mars will give you courage and confidence right now, just what you need to blaze an impressive trail.

Taurus 21.04 - 20.05
Your goals and ambitions in life are in the forefront. Your future seems to be holding some gain for you in the matter of speculation and investments - be sure to get good advice. These investments could be connected to a foreign shore.

Gemini 21.05 - 21.06
The sun is swinging its influence over your chart and you should have more than your share of opportunities to shimmy and shine. Much of this next period's action takes place at the foundation of your chart, which means the roots of life.

Cancer 22.06 - 22.07
Be philosophical Cancer! On the 30th, a whole new era comes in, heralded by the New Moon on the 28th. You will be called upon to teach or train others. Camaraderie with kindred souls is abundant and overwhelmingly personally satisfying.

Leo 23.07 - 23.08
There is still a lot to be done to get you where you want to be - onward and upward, Leo. You could have made a serious enemy, someone whom no amount of placating will charm, and being equally as tough is sadly the only way to go.

Virgo 24.08 - 23.09
Confronting unpalatable truths could be one of September's star features, whether you finally realise how you feel about someone or whether it is apparent that you cannot go any further in a particular direction. Pluto brings forth buried issues.

Libra 24.09 - 23.10
The financial area of your solar chart is under heavy fire at the moment. Well, you know what life is like for the balancing extremist - feast or famine! You should eliminate the dead wood, thereby freeing up some aspect of your life to new influences.

Scorpio 24.10 - 22.11
All through this year the planets have been endeavouring to set you on the right path, although in the process it may have seemed to be a case of mixed upheaval, fun and trauma one after another. This is certainly not the time to poke the tiger in the cage!

Sagittarius 23.11 - 21.12
This is your time to focus on the inner-you, to pay more attention to your dreams and to take care of your physical and mental health. It's one of the great periods of your year for socialising, schmoozing and other life-enhancing, success-making activities.

Capricorn 22.12 - 20.01
The New Moon (28th) brings opportunities to have fun bringing new endeavours and associations into being with some great results. Hopefully, those solar waves will be working their revitalising magic on your body and soul now.

Aquarius 21.01 - 20.02
There is much promise coming your way and many good opportunities will be knocking at your door very soon. Changes, although sometimes painful, are ultimately liberating and certainly therapeutic. Be open to new ideas and suggestions.

Pisces 21.02 - 20.03
Events and other people shape your life - so, in a way, maybe you'll have to become even more accepting and non-resistant. The key to success will be in letting go of the stubbornness and the ego and operating through the heart and the senses.
